Linked to this conference there is also a public event the evening before:

21st June 2015, 7.00pm – Perspectives on Climate Change

This public event on the 21st of June will be an informal event, held in the upstairs room of the [Belgrave Music Hall](#), Leeds, aiming to inform the public about climate change, and to give people a chance to ask leading academics (from a range of different disciplines) about climate change and responses to climate change.

The event will consider of a number of short presentations (about 5 minutes), ending with a panel discussion, in which the speakers will respond to questions from the audience. In keeping with the informal nature of the event, the event will not be a collection of unrelenting presentations one after the other. There will be time to relax, chat and drink in between presentations.

No need to register. Just turn up. (Arrive early to guarantee entry.)
